PROFILE

Economist–statistician and Deputy Director at Côte d'Ivoire's National Agency of Statistics (ANStat), leading four services across data collection, data management, methodology and advanced analytics. Founder of the ANStat DataLab, a sovereign data and AI platform that serves open-source language models on the agency's own infrastructure, and principal investigator of the national employment survey (ENE-M). Ph.D. candidate in economics at ENSEA, working on labour-market frictions in Côte d'Ivoire, with research on employment, poverty, fiscal incidence and AI exposure in informal labour markets.

EXPERIENCE

Agence Nationale de la Statistique (ANStat) · Abidjan, Côte d'Ivoire — Feb 2021 – Present

Deputy Director, Innovation, Data, Research and Methodology — 2026 – Present
Deputy Director, Methodological Innovation — Feb 2021 – 2026

Leadership

- Lead a sub-directorate of four services: the call centre (CATI, CAWI and multimode collection), data management and valorisation, methodological innovation, and advanced analytics and big data.
- Designing ANStat's data-access platform (microdata catalogue, metadata and access requests) on the agency's computing centre, and developing data-sharing partnerships with administrative data holders.

DataLab and AI infrastructure

- Founded and lead the DataLab. Designed and operate a sovereign platform on Kubernetes (RKE2) with single sign-on (Keycloak), object storage (MinIO), Onyxia and JupyterHub workspaces, and GPU model serving (vLLM).
- Built chat.anstat.ci, a public assistant that answers questions on official statistics in plain language, using open-source LLMs and an agentic retrieval-augmented generation (RAG) pipeline.
- Leading the move of statistical production (R, Python, Stata) from workstations to shared cluster compute; maintain the unit's open-source code base (github.com/cae-ins, 40+ public repositories).
- Led the national task force on integrating mobile phone data into official statistics.

Survey methodology and statistical production

- Principal investigator of ENE-M: redesigned the national employment survey from an annual survey into a quarterly rotating panel covering labour supply and demand (33 regions, 1,896 primary sampling units).
- Implemented 19th ICLS labour statistics (underutilisation indicators SU1–SU4, NEET, status in employment) in R and Stata, and Newton–Raphson GREG calibration benchmarked against CALMAR and ReGenesees.
- Set up ANStat's Corps of Survey Agents, a permanent network of 120 enumerators deployed across the country's regions.

Selected studies and advisory work

2026	Impact evaluation of the COSO project for youth labour-market integration in northern Côte d'Ivoire. Project manager.
2026	Local labour market and promising income-generating activities for women's empowerment and youth retention, Gôh-Djiboua Autonomous District. Deputy project manager.
2025	Needs of workers and their families, to inform adequate-wage setting, for the International Labour Organization. Project manager.
2025	Extreme poverty, vulnerability and inequality report, Ministry of Solidarity and the Fight against Poverty. In progress.
2023–24	Satisfaction survey of the first Government Social Programme (PS-Gouv). Project manager.
2023	Impact of the Mali border closure on ECOWAS economies. Deputy project manager.
2022	Penetration of digital terrestrial television in Côte d'Ivoire. Project manager.
2021	Extreme poverty, vulnerability and inequality report, Ministry of Solidarity: proxy-means-test targeting of poor households from the 2014 census and EHCVM 2018. Project manager.
Other	Statistical expert, ARPEJ project on youth employment and training policies (AFD, ILO); transport expert, AfDB Africa Infrastructure Knowledge Program; project manager, public-service user satisfaction pilot for the Public Service Observatory.

EARLIER EXPERIENCE

Consultant – Data Scientist · *SINDEV, Abidjan* Sep 2020 – Aug 2021
- Built a cashew-disease detection model using computer vision (YOLOv4).

Financial Programmer Analyst · *Soumaré Institute of Finance, Abidjan* May 2020 – Jan 2021
- Built a commodity trading application, Python option-pricing programs and a WAEMU yield-curve model.

Consultant – Data Analyst · *AVAKO / Afrik-Insights, Abidjan* Mar – Apr 2020
- Estimated appetite for digital services in Côte d'Ivoire, Senegal, DR Congo and Cameroon.

Research Assistant · *ENSEA, Abidjan* Jun – Aug 2017
- Analysed determinants of households' health-related quality of life in Aboisso, Côte d'Ivoire.

EDUCATION

École Nationale Supérieure de Statistique et d'Économie Appliquée (ENSEA) · Abidjan

Ph.D. in Economics (in progress) 2026 – 2029 (expected)
Thesis on labour-market frictions in Côte d'Ivoire.

Ingénieur Statisticien Économiste (ISE) 2017 – 2020
Master's-level degree in statistics and economics, major in finance.

Technical Officer in Statistics 2012 – 2015

Certificates: J-PAL 101x Evaluating Social Programs (MITx Online, 2023) · Impact Evaluation Methods with Applications in Low- and Middle-Income Countries (Georgetown University, edX, 2022)

RESEARCH

2026 Fiscalité, informalité, transferts et pauvreté en Côte d'Ivoire : une analyse d'incidence sur l'EHCVM 2021. With Armand Djaha and N'Dre Lebe. In French. [Replication code]

2025 Estimating Poverty with Satellite Imagery in Developing Countries: Evidence from Côte d'Ivoire. With Koné Kinin Mamadou, Moussa Kouamé Richard, Koné Djoudori Joachim, Kouassi Kouamé Aristide and Doukouré Daouda.

2024 Exposure to Violence and Academic Performance Among Adolescents in Côte d'Ivoire. With Sekongo Coulibaly.

2024 The Causal Impact of Armed Conflict on Education Outcomes in Mali. With Josias Sadia.

2022 Job Quality and Poverty in Developing Countries: Evidence from Côte d'Ivoire.

Ongoing AI Exposure in a Dual Labor Market: Evidence from Côte d'Ivoire's National Employment Survey.

Ongoing Job Creation and Job Destruction in Côte d'Ivoire, 2016–2024. With Ehouman Zora.

SKILLS

Methods Sampling and rotating-panel design · GREG calibration · small area estimation (Battese–Harter–Fuller) · proxy-means testing · impact evaluation (difference-in-differences, matching) · ILO/ICLS standards

Code R · Python · Stata · SPSS · Git · LaTeX · Quarto

AI & data Kubernetes (RKE2) · vLLM · Keycloak · MinIO · FastAPI · RAG pipelines · computer vision (YOLO, CNN transfer learning)

Languages French (native) · English (fluent, professional working proficiency)

TEACHING

2026–27 Survey Sampling (25 h, semester 2), ENSEA, Abidjan.

2025–26 Sampling (STT 504), Master 2 Data Science and Statistics, Université Soumaré, Abidjan. [Course materials]

2022–24 Econometrics tutorials, L3 Economics and Management, Université Catholique de l'Afrique de l'Ouest.

CONFERENCES, COOPERATION AND AWARDS

2024 IAOS–ISI Conference, Mexico. Accepted presentation, not delivered because of visa constraints.

2023 IAOS–ISI Conference, Livingstone, Zambia.

2021 1st prize, FIRCA Agricultural Innovation Competition, for cashew-disease detection by image recognition.

2018 1st prize, Hackathon Africa Digital Revolution (CIE), for a blockchain anti-corruption tool.

Other SHaSA II Specialised Technical Group 17.
